Skybed: 1700L x 650W and will hold a weight of approx. 65 - 70kgs, it is attached to the front wall of the Earthcruiser via a sailtrack. The skybed base is made from very tough and durable trampoline type fabric that houses a high grade, light-weight aluminium	
tube with spring loaded pins so the pole is easily removed from the slots in the side walls. The mat can then be either rolled-up to	
the front wall out of the way or you can slide it out of the sail track and remove it entirely. This SKYBED platform is also ideal to be utilized as another storage area in the vehicle, being out of the way and easily accessed, and it doesn't obstruct your
